

In the Social Skills Course, children will learn how to conduct themselves in ways that allow them to develop meaningful relationships with their peers. The course teaches appropriate and positive social interactions through fun and challenging game play. Students learn how to cooperate effectively, identify common goals, respect each other and accept differences within group members. The students will learn to effectively utilize each member's attributes and respective contributions as they are exposed to various thinking models and strategies, such as the V Method and the Chain Effect.
