

Nexple offers our programs in a variety of exciting summer day camps that are the perfect blend of learning and fun, with one or more of our engaging programs taught by an experienced instructor right at your school or facility! These themed mini-camp courses typically run for one week, with lessons lasting 3 hours per day. The following options are available:

RoboCoding

Coding without a computer? It's the best way to start! This program gives students a hands-on introduction to the fundamentals of both coding and robotics, allowing them to build and execute programs in the real world! With award-winning Cubelets™ kits, students combine robotic cubes—each with their own unique function—to create machines that can light up, move, and interact with the world.

Art Meets Science Camp

This camp is all about creativity and exploration, with daily activities divided in 2 segments:

Art Around the World

Students explore different cultures with projects inspired by art from around the world. Each lesson teaches fundamental techniques and concepts, such as color mixing, drawing, shading, and texture.

ScienceWiz

This program is built upon inquiry, experimentation, and play! Students will receive their very own ScienceWiz™ kit and use it to dive deep into one important scientific concept, like electricity, sound, physics, and more!

Makers Club

This program inspires kids to explore, experiment, and create! Students interact with Maker Kits that enhance mechanical, arts, and engineering skills, while encouraging them to act as inventors in their own right. Participants design and build their own hydraulic arms, harness energy to power race cars, and experiment with structural design. Plus, students can keep their inventions to share with family and friends. Makers' Club is fully aligned with NGS Standards.

Mind and Body Camp

This camp offers a holistic approach to learning that leaves all participants empowered in mind and body with two daily segments:

Games

Students play internationally-acclaimed mind games, learn metacognitive strategies and apply 21st century thinking skills. Through Nexple Games' unique method, participants learn *how* to think, rather than *what* to think.

Zumba

In this high-energy fitness experience, participants learn new dance moves, build cultural awareness, enhance community and have a blast with all of the movement activities!

Magic Camp

Welcome to the world of Magic where every child is a star! In this unique summer camp, students build self-confidence, performance skills, and theatrical charm to wow their audience with tricks from their very own magic kits! New to the world of magic? This is the perfect place to start!
